Odile Brandqvist

Product Engineer | Edinburgh, Scotland | hello@example.com

SAMPLE CV FOR A FICTIONAL PERSON. Replace public/cv.pdf with your own.

Profile

Product engineer who builds calm, offline-first software for people who work on their feet: drivers, nurses and warehouse teams. Nine years in software after three in civil engineering.

Experience

Staff Product Engineer, Saltmarsh Transit Co. (2024 to now), Edinburgh (hybrid)

- Leads product engineering for the driver and depot apps used across a regional freight co-operative.
- Designed the offline sync queue behind Route Ledger, which has not lost a proof of delivery since launch.
- Runs a fortnightly ride-along programme so engineers spend a shift with a driver.

Senior Product Engineer, Brindlecart (2021 to 2024), Glasgow

- Built Shelfwise, the stock forecasting dashboard used by independent grocery stores.
- Introduced plain language explanations for every forecast, doubling accepted suggestions.
- Mentored three junior engineers, two of whom now lead their own squads.

Product Engineer, Fernwhistle Health (2019 to 2021), Edinburgh

- Built the Clinic Queue check-in kiosk and waiting room screen for outpatient clinics.
- Ran accessibility testing sessions with patients and reception staff before every release.

Developer, Quillfern Labs (2017 to 2019), Dundee

- Built experiment templates and the audit trail for Benchnote, a shared lab notebook.
- Moved from part-time scripting to full product work within the first year.

Graduate Civil Engineer, Lanternmoth Surveying (2014 to 2017), Aberdeen

- Worked on drainage and small bridge surveys, and wrote spreadsheet tools that the team still uses.

Skills

TypeScript, React Native, React, Next.js, PostgreSQL, SQLite, offline sync, accessibility, user research. Side projects in Rust, Python and SvelteKit.
